# Handbook of the University of Georgia

---

WHAT WILL A UNIVERSITY EDUCATION DO FOR A YOUNG GEORGIAN?

It will do for him what it has done for thousands of other Georgians during the century and more of the University's existence.

Senator A. O. Bacon, of the class of 1859, says: "From my early manhood to the present time there has ever been with me a most gratifying and sustaining consciousness of increased strength and advantage in the fact that I am a graduate of the University of Georgia."

Rev. Dr. Benjamin M. Palmer of New Orleans, Class of 1838, the grand old man of the Southern Presbyterian Church, whose sad death two years ago robbed the Christian Church of one of its most honored laborers, wrote in 1900: "If in physical condition at the time to allow it, I will endeavor to be present at the Centennial, and render private homage to the University which I have always been proud to regard as my Alma Mater."

These testimonials of affectionate regard for the University and of gratitude for its training are typical of the way in which it is looked upon by its alumni everywhere.

## The University

THE University of Georgia was chartered in 1785. It is therefore the oldest State University in the Union. It opened its doors in 1801, and through those doors have passed, for more than three generations, the men who have made the State what it is today. Here have come men like GEORGE F. PIERCE, NATHANIEL M. CRAWFORD, THOMAS F. SCOTT, EDWIN G. WEED, BENJAMIN M. PALMER, THOMAS O. HOYT, R. Q. MALLARD, SHALER G. HILLYER, C. M. BECKWITH, A. M. WILLIAMS, JOHN D. HAMMOND, G. A. NUNNALLY, ROBT. J. WILLINGHAM, W. S. BEAN, CHARLES R. NISBET, LUCIAN L. KNIGHT, J. J. BENNETT, and many others, to receive a generous training

for their useful and illustrious careers in the Christian Ministry. Here were trained for their work in the Army and Navy men like JOHN B. GORDON, FRANCIS S. BARTOW, T. R. R. COBB, HOWELL COBB, THOS. M. BRUMBY, who stood on the bridge with Dewey at Manila, ALBON C. HODGSON, Schley's navigator on the "Brooklyn" at Santiago, Generals BENNING, TRACY, HENDERSON, PHILLIPS, GARTRELL and GARLINGTON, Colonels LAWTON and BERNER, and a host of others. In the Law, University alumni have been always prominent. Justice JOHN A. CAMPBELL, of the United States Supreme Court, should perhaps head the list, with Chief Justice LUMPKIN, Chief Justice JACKSON, Associate Justices EUGENIUS A. NISBET, SAMUEL HALL, LINTON STEPHENS, EBENEZER STARNES, ANDREW J. COBB, WILLIAM A. LITTLE, WILLIAM H. FISH and more than one hundred others who have occupied the bench in this and other states. Six alumni have served in the United States Senate, and about fifty in the House of Representatives. The names of University men in Statesmanship are among the most illustrious in Georgia History: BENJAMIN H. HILL, ALEXANDER H. STEPHENS, ROBERT TOOMBS, HERSEL V. JOHNSON, HOWELL COBB, JAMES H. BLOUNT, J. L. M. CURRY, CHAS. J. JENKINS, W. Y. ATKINSON, AUGUSTUS O. BACON and a multitude of others.

The University has been the great bulwark of Education in the state. It has given to the Commonwealth Bishop PIERCE, Founder and President of Emory College; NATHANIEL M. CRAWFORD, President of Mercer University; W. Y. ATKINSON, Founder of the Girls' Normal and Industrial College at Milledgeville; NATHANIEL E. HARRIS, Chairman of the Board of Trustees of the School of Technology, at Atlanta, and P. W. MELDRIM, Chairman of the Board of Commissioners of the Industrial College for Colored Youths at Savannah.

Besides these, the roll of teachers is long and eminent: JOSEPH LeCONTE, JOHN LeCONTE, SHELTON P. SANFORD, MORGAN P. CALLAWAY, LAWTON B. EVANS, CHAS. H. HERTY, GUSTAVUS J. ORR, JAMES P. WADDELL, W. M. SLATON, G. R. GLENN, WILLIAMS RUTHERFORD, A. W. VAN HOOSE, and hundreds of the best and most useful laborers in the great field of Education in this and other states. University alumni are found in its own

## THE ACADEMIC BUILDING

This building was constructed by incorporating the old Ivy Building, of two stories, into a three story building similar in size and appearance to the old Library Building, with which it was then connected by a broad wing behind and a large portico in front. The floor space of this building amounts to more than two-thirds of an acre. The architect of the reconstructed building was Prof. C. M. Strahan, of the School of Civil Engineering.

faculty, in the faculties of the Technological School, Mercer University, the Medical School in Augusta, the State Normal School, at the head of Public School Systems, and in the teaching force of High Schools and Primary Schools all over the State.

Space is wanting to name the alumni who have honored the State in other lines of endeavor, as Financiers, Farmers, Journalists, Engineers, Merchants, Manufacturers, Physicians, etc. A very few names must suffice:—In Medicine: CRAWFORD W. LONG, the discoverer of Anæsthesia, RICHARD D. MOORE, PAUL F. EVE, DE SAUSSURE FORD, WM H. DOUGHTY; In Agriculture: DUDLEY M. HUGHES, JUDSON L. HAND, D. B. FITZGERALD, ROBERT C. BERCKMANS, JOHN BOSTWICK, JAMES H. MOBLEY, JOHN GILMORE, G. F. GOBER, JR. In Finance or Engineering: SAMUEL SPENCER, JOEL HURT, CHARLES A. COLLIER, JAMES M. EDWARDS, W. D. GRANT, JOHN S. BAXTER, RALPH PETERS, PRESTON S. ARKWRIGHT, B. M. HALL; In Manufacturing: T. C. NISBET, B. S. WALKER, T. P. VINCENT, E. R. HODGSON, STEWART PHINIZY, W. P. HUGULEY, A. D. SCHOFIELD; In Journalism: H. H. CABANISS, CLARK HOWELL, HENRY W. GRADY, PLEASANT A. STOVALL, JOHN TEMPLE GRAVES, W. A. HEMPHILL, REMSEN CRAWFORD.

Such a list is necessarily incomplete, but serves to show the manner of men who have gone out from the halls of the University.

The training they received is given in richer, fuller measure today, in the laboratories, society halls and libraries of the old, and yet ever new, University.

### Athens

HE city of Athens is an ideal spot for the location of a University. It is situated on high ground, among the rolling hills of Northeast Georgia. The drainage is good, the system of sewers excellent, and the water perfectly pure. The town is remarkably healthy, and typhoid fever is almost unknown. Successful vaccination is a requirement for admission to the University. The health of the students is looked after in every way.

The town has electric lights, street cars, local and long-distance telephones, paved streets, no barrooms, and good railroad

### DENMARK DINING HALL

The University Dining Hall, accommodating 200 students, where good Board is provided for about eight dollars a month.

### CANDLER HALL

Used as a Dormitory, accommodating 86 students. All rooms in the dormitories are occupied rent free by the students.

connections. The Seaboard, Southern, Georgia and Central of Georgia center here.

### Bill Arp's Opinion

UR genial friend and alumnus, the late Col. Chas. H. Smith, said: "Athens is still the central seat of art and learning, of good morals and good manners, and the pride of our state, and that citizen is not to be envied whose love of learning and whose reverence for historic virtue does not gain force as he ponders upon her history of a hundred years."

### Moral and Religious Interests

VERY member of the Faculty of the University is a member of some branch of the Christian Church. Bible classes are conducted by members of the Faculty, for the special benefit of students, in three of the leading churches of the town. All students are required to attend morning prayers in the chapel every week day, at which service members of the Faculty officiate.

### Testimony of Athens Ministers

EV. W. H. Young, Ph. D., of the First Baptist Church, says: "It so happens that the state has located her University in a town peculiarly moral, and free from the temptations that are inseparable from many other great institutions of learning. \* \* This freedom from the open barroom also frees the city from all other low resorts and temptations to an irreligious life. No city can possibly surpass Athens for its high moral tone and successful removal of the worst of temptations from the students who become its temporary wards."

Rev. Troy Beatty, Rector of Emmanuel Episcopal Church, testifies as follows: "It has not been my privilege to know the whole student body \* \* \* but those whom I have known \* \* are as fine a set of young men as I have ever known—clean and manly."

Dr. J. W. Walden, Pastor of the Presbyterian Church, after six years of observation, has this to say:—"I have been impressed, from the beginning of my residence in Athens, with the quiet, well behaved character of the student body."

## AGRICULTURAL HALL

On the first floor is situated the Soil Physics Laboratory, with the Dairy Equipment. On the second floor is a large lecture room, and adjoining it is the office and department library for the School of Agriculture. Seven acres of ground next to this building are reserved for experimental work in Agriculture.

Dr. I. S. Hopkins, Ex-President of Emory College, Ex-President of the Georgia School of Technology, and now Pastor of the First Methodist Church, says:—"My observation of the students of the University during a residence of a year and a half in Athens, has left with me a most pleasing impression. Quiet conduct on the streets, courteous treatment of citizens, an air of studiousness on the grounds of the University, and respectful attention at religious services, indicate a most favorable condition of affairs in the institution."

Dr. I. A. Rubenstein, Rabbi of the Synagogue, expresses his opinion as follows:—"From observation, I consider the moral tone of the students at the University exceedingly gratifying."

Rev. A. B. Reeves, Pastor of the Christian Church, himself a special student in the University this year, says:—

"I find among the students of my acquaintance a wholesome moral atmosphere"

As typical of the way in which mistaken notions about the University are corrected upon closer acquaintance, the testimony of a graduate in Law, Mr. J. Ellsworth Hall, may be of interest:

"I am an alumnus of Emory College, (1896). \* \* \* \* I feel constrained, however, to say this in answer to adverse criticisms aimed at the University of Georgia. I spent the year 1899-1900 in attendance upon the University. \* \* I was in close touch during my work in Athens both with the large majority of the student body and with the prevailing influences within and without the gates of the campus; I saw nothing of foundation for the hostile notions I had formed; \* \* \* I should willingly commit to the conditions which prevail at the University any young man whose sobriety, integrity, and culture of mind and heart were important considerations to me."

Legislative Committees and Boards of Visitors, who are specially charged with the duty of investigating every phase of University work and discipline, have borne the same testimony to the moral tone existing among the students here. During the recent military encampment, the University Cadet Corps won golden opinions from the people of Gainesville for their good behavior.

And yet there are people who, in ignorance of the truth, say that the University produces "moral wrecks." Pierce, Ruther-

## CLASS IN DAIRYING

Students at work in the Dairy Laboratory on the first floor of Agricultural Hall.

ford, Palmer, Beckwith, Crawford, Scott, Mallard, Willingham, Gordon, Curry, N. E. Harris, S. B. Adams—would that the University might always produce in abundance such “moral wrecks” as these!

### Departments of the University

HE University is composed of several colleges or departments:—1. Franklin College, or the classical Department, which gives the degree of A. B., and requires both Greek and Latin in its curriculum. 2. The State College, or Scientific Department, which requires no Greek, and offers the degree of Bachelor of Science in a General Course, as well as in special professional courses in Agriculture, Civil Engineering and Electrical Engineering. 3. The Graduate School, in which graduates of this and other colleges pursue advanced work. 4. The Law Department, which offers the degree of Bachelor of Law on completion of a two years' course. 5. The College of Pharmacy, offering the degree of Graduate of Pharmacy after a nine months' course.

### Faculty

HE faculty consists of 28 members, who have received their training at the great German Universities, at Columbia, Harvard, Chicago, University of Virginia, University of North Carolina, Johns Hopkins, Cornell, University of France, and other famous institutions, including colleges of Medicine and Pharmacy.

### Campus and Buildings

N the campus of thirty seven acres, situated in the center of the city of Athens, are grouped the buildings of the University, as follows:—The Academic Building, containing nearly an acre of floor space; the new fireproof Library, costing \$50,000, the gift of Mr. George Foster Peabody, a native Georgian; the Old College; the New College; the Chapel; Moore College, the gift of the city of Athens; Science Hall, destroyed by fire in November last, and now being rebuilt on better lines; Demosthenian Hall; Phi Kappa Hall; Agricultural Hall; Candler Hall; Denmark Hall; the Chancellor's residence; four Professors' houses, and the buildings used for the Dairy School.

The campus also contains the tennis-courts, athletic field and drill ground for the Cadet Battalion.

## SOY BEANS AND SORGHUM

Forage crop on University Campus.

## General Library

 HE General Library of the University, including the repository of government publications, contains about 30,000 books and pamphlets, many of which are rare and valuable works collected during the library's long history, and now difficult of duplication.

The accessions to the library, numbering nearly one thousand volumes each year, keep it abreast of the times. The library is heated by steam, lighted by electricity, and kept open every day and two hours every night except on Sunday.

## Department Libraries

 OR facilitating the use of books relating to the courses offered, all of the schools in the University have libraries of their own, conveniently placed for ready access.

## Laboratories

 HE University is well equipped with apparatus for thorough instruction and research in those schools whose efficiency may be increased by laboratory facilities,—Chemistry, Biology, Physics, Electricity, Civil Engineering and Agriculture.

## Societies and Clubs

 OR practice in oratory and debate, the Demosthenian and Phi Kappa Societies, which meet every Wednesday night of the session, form valuable adjuncts to the work of the University. The Law Debating Society discusses questions of law, and its roll of members contains only law students. The Euphradian Society is a select club for the purpose of stimulating interest in literary work. The Engineering Society discusses scientific topics of all kinds, especially those bearing on Civil and Electrical Engineering.

## Admission Requirements

 EQUIREMENTS for admission to the University are set forth in detail in the University catalogue, which may be obtained by writing a postal card to Chancellor Hill at Athens. The applicant must be not less than 15 years of age, and must stand entrance examinations, unless he comes from an accredited school, in which case his certificates will be accepted, as

*A Place to look for  
Bird Homes*

Specimen page from "Georgia Nature Study," a series of leaflets issued by the School of Agriculture and distributed free to the children of the state.

far as they go, in lieu of entrance examinations, under agreements made with those schools.

Entrance Examinations are held upon the campus at Commencement and at the opening of the Fall Session. (For dates consult the catalogue.) Students who are not fully prepared in some of the subjects required may be admitted on condition that they make up their deficiencies within a specified time, but no student is admitted to any degree course in which he is conditioned on more than two subjects. An excellent plan for intending students who are deficient is to attend the University Summer School in Athens, (from July 5 to August 6), where they will be enabled to make up all deficiencies and become acquainted with the University which is to be their home for some years.

### Military Tactics

ILITARY Drill is held regularly in the University, affording valuable training to the students in habits of discipline, manly bearing and obedience to orders, as well as healthful physical exercise. This Spring the Cadet Battalion went into camp for one week at Gainesville, and the results attained were so important and successful that the Encampment plan, which was an experiment this year, will probably be followed regularly hereafter.

### The School of Agriculture

O school in the University has made such rapid strides during the past few years as the School of Agriculture. The improvements have been as follows:—1. The teaching force in the school is larger and better trained for the work than in years past. 2. A new farm was purchased some years ago for the use of the school, and many improvements have been lately made upon it. 3. The building known as Philosophical Hall has been thoroughly remolded and re-named Agricultural Hall. On the first floor is the Dairy Laboratory, while on the second floor are situated the lecture room and office of the school. Rooms for mixing fertilizers and other purposes have been added to the building. 4. A plot of seven acres, on the campus, adjacent to this building, has been set aside for experimentation on the intensive plan of farming, the use of fertilizers, etc. 5. Funds have been provided for the issuance by this school of Nature

## COTTON—EXPERIMENT ON CAMPUS AREA

Delegates to Agricultural Society pronounced this the Finest Piece of Cotton in Georgia.

Study Leaflet. Editions of from seven to ten thousand are sent out to teachers and others all over the state. These leaflets are well printed, carefully prepared, and attractively illustrated. Their object is, of course, to stimulate and increase the love of nature and nature study on the part of the children of this generation. 6. A new One Year Course in Agriculture has been established, and has been for two years in successful operation. 7. The Short Winter Course of three months has been remodeled and improved. 8. A Two Weeks' course of lectures for farmers as well as for the students of agriculture has been organized, and was given this spring with good results.

### Farmers among the Alumni

 HE New Alumni Catalogue shows that 393 graduates of the University have devoted themselves to farming, to which number should be added several of last year's graduates. A few of the University men in Agriculture are named on page 4.

### New One Year Course

 ESIDES the full four years' course, leading to the degree of Bachelor of Science in Agriculture, there is offered to those students of Agriculture who cannot afford to spend four years here, a course comprising the essential subjects of the full course, presented in a condensed form, and as clearly as time permits, together with practical work on the farm and in the Dairy Laboratory. There are no entrance requirements for this course beyond a fair common school education.

### Short Winter Course

 SHORT course, covering only three months, is given during January, February and March for the benefit of farmers' sons and others who can spend only a short time away from the work of the farm, and yet desire a better preparation for their life-work. There are no entrance examinations and no fees, but the applicants must not be less than fifteen years of age.

### The Law Department

 R. Boykin Wright, Ex-Attorney General, says: "Become a lawyer! (a) By acquiring a college and, if possible, a university education—preferably in one's own state. (b)

*By taking not less than a two years' course at a first-class law school."*

The italics are ours, inserted for the purpose of drawing attention to one of the important features of the Law Department—*the two years' course.*

The foregoing advice is from an article written by Mr. Wright, entitled "Advice to Young Lawyers."

He is abundantly sustained in his position by the action of the American Association of Law Schools, *which refuses to admit to its membership a one-year law school, or to recognize it in any way.* Full information as to courses of study, cost of tuition, etc., may be obtained by dropping a postal card to Prof. Sylvanus Morris, Dean of the Law Department, Athens, Ga.

### The College of Pharmacy

N excellent course has been established here in the Science of Pharmacy. The course covers one session of nine months, and affords exceptional advantages to the students of Pharmacy. Full information may be obtained by sending a postal card to Dr. S. C. Benedict, Dean of the College of Pharmacy, Athens, Ga.

### The University Summer School

six-weeks' summer school was held in Athens last summer, the registration of students amounting to 670. The faculty was composed of eminent educators from this and other states. The second session of the Summer School will be held in Athens during the coming Summer, beginning July 5 and ending August 6. The attendance is expected to surpass even that of last Summer. *This school affords a good opportunity for conditioned students to make up their back work, and for illy-prepared students to become thoroughly fitted to enter this or some other institution in the fall.*

Full information as to courses, fees, etc. may be obtained from Prof. F. M. Harper, Athens, Ga.

### Expenses at the University

mistaken, though widespread notion exists that the University is for rich men's sons; that it is too expensive for poor boys. Nothing could be further from the truth, as

hundreds of poor boys will testify. In the first place, *tuition is free*. Next, *room rent in the three dormitories is free*. Board is obtained at the Students' Dining Hall at from *eight to eight dollars and a half per month*.

A matriculation fee of ten dollars is charged, and a library fee of five dollars. No medical fee, general repairs fee or diploma fee is charged. Every student, unless excused from drill, is required to possess a uniform, the cost of which is about fifteen dollars if new, and much less if purchased second-hand. Books may be bought at greatly reduced prices from the students' book store. The initiation fee to a literary society is two dollars. Small fees are charged in the Physical, Chemical and Biological laboratories to students taking those courses. It will thus be seen that *the actual expenses for a session of nine months are but \$125, exclusive of clothing and railroad fare*.

### Self Help

 ANY opportunities for self-help are afforded to needy students, and quite a number are working their way through college. Some do stenographic work, some keep books for firms in Athens, some work in printing offices, some deal in clothing, books and students' supplies, some run "pressing clubs," some do shaving for their fellow students, some work on the University farm, etc. *It is safe to say that any energetic, ambitious boy, who is not afraid to work, may obtain a University Education here by his own labor.*

### The Brown Fund

 HE University has been entrusted with a fund of fifty thousand dollars, donated by the late Governor Joseph E. Brown. The interest on this sum is annually loaned to students in need of financial assistance. Applications for loans from the fund must be received before April 1 of each year. For details consult the University Catalogue, or the Chancellor.

### Student Life

 OL. Pleasant A. Stovall, of the *Savannah Press*, Class of '75, says: "There is a *camaraderie* at Athens that is never broken." Men are measured by merit. There is

ABRAHAM BALDWIN  
Founder of the University of Georgia

no caste. Half of the boys in my class borrowed money to complete their course. The men who commanded respect and won even the honors awarded by the student-body were the hard workers and poor boys."

### Student Publications

 SEVERAL publications are issued by the students, as follows:—"The Red and Black," a weekly sheet of college news, is published under the auspices of the Athletic Association. "The Georgian," a monthly magazine, published by the two literary societies, is devoted wholly to literary matters. "The Engineering Society Annual," now in its eighth volume, publishes the best original scientific papers of the year. "The Pandora," an illustrated annual, is published by the student body.

### College Y. M. C. A.

 HE University Young Men's Christian Association has a large membership, and exerts an excellent influence. Bible classes are organized for close study of the Scriptures, and meetings are held regularly for devotional purposes.

### Athletics

 ITH wholesome restrictions, Athletics at the University are encouraged. The Athletic Association maintains football, baseball, tennis and track teams, which are allowed a certain number of contests each year, but which cannot leave Athens unless accompanied by the Physical Director or some other member of the faculty. The rules governing Athletics are those of the Southern Inter-Collegiate Athletic Association, copies of which may be obtained from the Physical Director.

*Special attention is directed to the rule that from now on no man is eligible to play on a College team who hereafter shall play baseball on any league team, (even a minor league), or who shall accept any money or other emolument, directly or indirectly, for playing ball on any team whatever, (even for his expenses), other than a college team; Provided, however, that if a man play on his home team, said team not to be a member of any league, he may receive his necessary expenses—board, lodging and transportation,—while playing with the*

*team. By "home team" is meant the team of the town in which he is residing and has resided for one year just previous to his playing with said team.*

Men who are delinquent in their studies cannot travel with the team until their work is made up in a manner satisfactory to the faculty.

No student is allowed to engage in intercollegiate contests unless he have the consent of his parents or guardian. The effects of athletics are good in making strong, manly men, subservient to discipline, "temperate in all things," believers in fair play.

### Medals and Distinctions

**I**N order to stimulate effort and reward excellence, the prizes offered in the University are many and valuable. Eight gold medals are offered by the Trustees for excellence in debating; a "Ready Writer's Medal" is given to the student handing in the best essay written upon a theme announced after the competitors enter the examination room; the class of 1875 offers a medal for general excellence in the Freshman class. The sons of the late Prof. Wilcox offer a prize of \$50 in gold to the Senior whose final examination paper in French or in German is considered the best; a silver cup is offered to the best Sophomore Declaimer at Commencement; a medal is given to the best drilled cadet in the Battalion; Hon. W. J. Bryan offers a prize to the writer of the best essay on our form of government; the Horace E. Russell prize of \$50 is offered to the writer of the best essay on some subject in Psychology, and the Walter B. Hill prize, of like amount, is offered for the best essay submitted by a member of the class in Ethics.

There is keen competition also for positions to which no prizes are attached, such as representatives' place in intercollegiate debates. Of the eight debates held with other institutions, the University has won four.

### The Centennial of the First Commencement of the University of Georgia

**T**HE approaching Commencement, June 11-15, is the one hundredth anniversary of the First Commencement of the University of Georgia. It has been decided to celebrate

it as the Centennial Commencement. The first occasion was held before the institution had any buildings containing an auditorium; it was therefore held *sub arboribus*, in the open air.

In order to bring vividly before the minds of the living the courage and faith of the fathers who planted a University here in the midst of an almost unbroken forest, the Centennial Commencement will be likewise celebrated under a bush arbor, erected on the very spot where the arbor stood one hundred years ago. The *Alma Mater* calls for a general gathering of the Alumni (including both graduates and matriculates), and all other friends of the University, on this auspicious occasion.

### Programme of the Centennial Commencement

OLLOWING is the programme of the Centennial Commencement:

Saturday, June 11th, 8:00 p. m., Champion Debate between the Phi Kappa and Demosthenian Literary Societies.

Sunday, June 12th, 11:00 a. m., Baccalaureate Sermon, by Bishop Thomas F. Gailor, of Tennessee.

Monday, June 13th, 11:00 a. m., Sophomore Declamations.  
4:00 p. m., Junior Orations. Delivery of Sophomore Cup and Debaters' Medals, by Rev. Charles R. Nisbet, (Class of 1893), Atlanta.

Tuesday, June 14th, 10:00 a. m., Meeting of The Alumni Society.

12:00 m., Oration before The Alumni Society, by Hon. James H. Eckels, formerly Comptroller of the Currency, Chicago.

5:00 p. m., Reception of the Library; Address by Dr. Francis G. Peabody, of Harvard University.

6:30 p. m., Alumni Reunion and Refection in Denmark Hall.

Wednesday, June 15th, 10:30 a. m., Senior and Law Class Orations.

12:00 m., Baccalaureate Address, Hon. William G. Brantley, of Georgia. Conferring of Degrees.

### Reduced Rates on the Railroads

REDUCED railroad rates have been given for the Centennial Commencement. Dates of sale will be given later in the papers of the state.

## ANNOUNCEMENT

COMMENCEMENT will occur on June 15, 1904. The University will resume its session on September 15, 1904. Entrance examinations will be held on the campus on September 13 and 14. Applicants for admission who have not passed the examinations should arrive in Athens and report to the Chancellor on September 11. Those who have satisfied the entrance requirements should arrive not later than the day before the opening of the session.

For the catalogue of the University of Georgia, or for further information, address  
WALTER B. HILL, Chancellor,  
University of Georgia,  
Athens, Georgia.
